Man GLG Japan CoreAlpha Fund Professional Accumulation Shares (Class C)

(ISIN:GB00B0119B50) Man GLG Japan CoreAlpha Fund (the 'Fund') is a sub-fund of Man International ICVC (the 'Company').

Man Fund Management UK Limited, part of Man Group plc, is the Authorised Corporate Director.

Objectives and investment policy

- The Fund seeks capital growth through investing primarily in the quoted securities of companies operating in Japan. The Fund is predominantly invested in companies listed on Japan's stockmarkets.
- The Fund may use financial derivative instruments (instruments whose prices are dependent on one or more underlying asset 'FDI') where it is more economically effective than holding the underlying asset or for other efficient portfolio management purposes. The Fund is not expected to have an increased market exposure (leverage) as a result of such investments.
- Income earned on investments will be added to the value of investors' shares. Shares can be bought and sold on each Dealing Day.

Risk and reward profile

- The lowest category does not mean 'risk free'.
- The risk and reward profile is not guaranteed and may change over time.
- Historical data may not be a reliable indication for the future.
- The risk category for this share class is 6 as funds of this nature engage in strategies that typically have a high volatility. The calculation is based on the historical volatility of the Fund's performance. Where there is insufficient Fund performance the calculation is based on either the historical volatility of a relevant benchmark for the investment strategy or the manager's Value at Risk limit for the Fund. Please refer to the prospectus for further information relating to the Value at Risk.

The following risks may not be fully captured by the risk and reward profile:

- Liquidity characteristics of non-exchange listed investments can be irregular, and may result in higher than anticipated costs to liquidate the investment.
 - The use of FDI involves additional risks: (i) FDI may be highly sensitive to price movements of the asset on which they are based; (ii) a counterparty to a non-exchange traded FDI may not meet its payment obligations in the event of default.
 - The Fund is a specialist country-specific fund which, as a result, may carry greater risk than a more internationally diversified portfolio.
 - The Fund is subject to normal market fluctuations and the risks associated with investing in international securities markets.
 - The value of your investment and the income from it may rise as well as fall and you may not get back the amount originally invested.
- A complete description of risks is set out in the prospectus section entitled 'Risk Factors'.
